STÁIR NA HÉIREANN

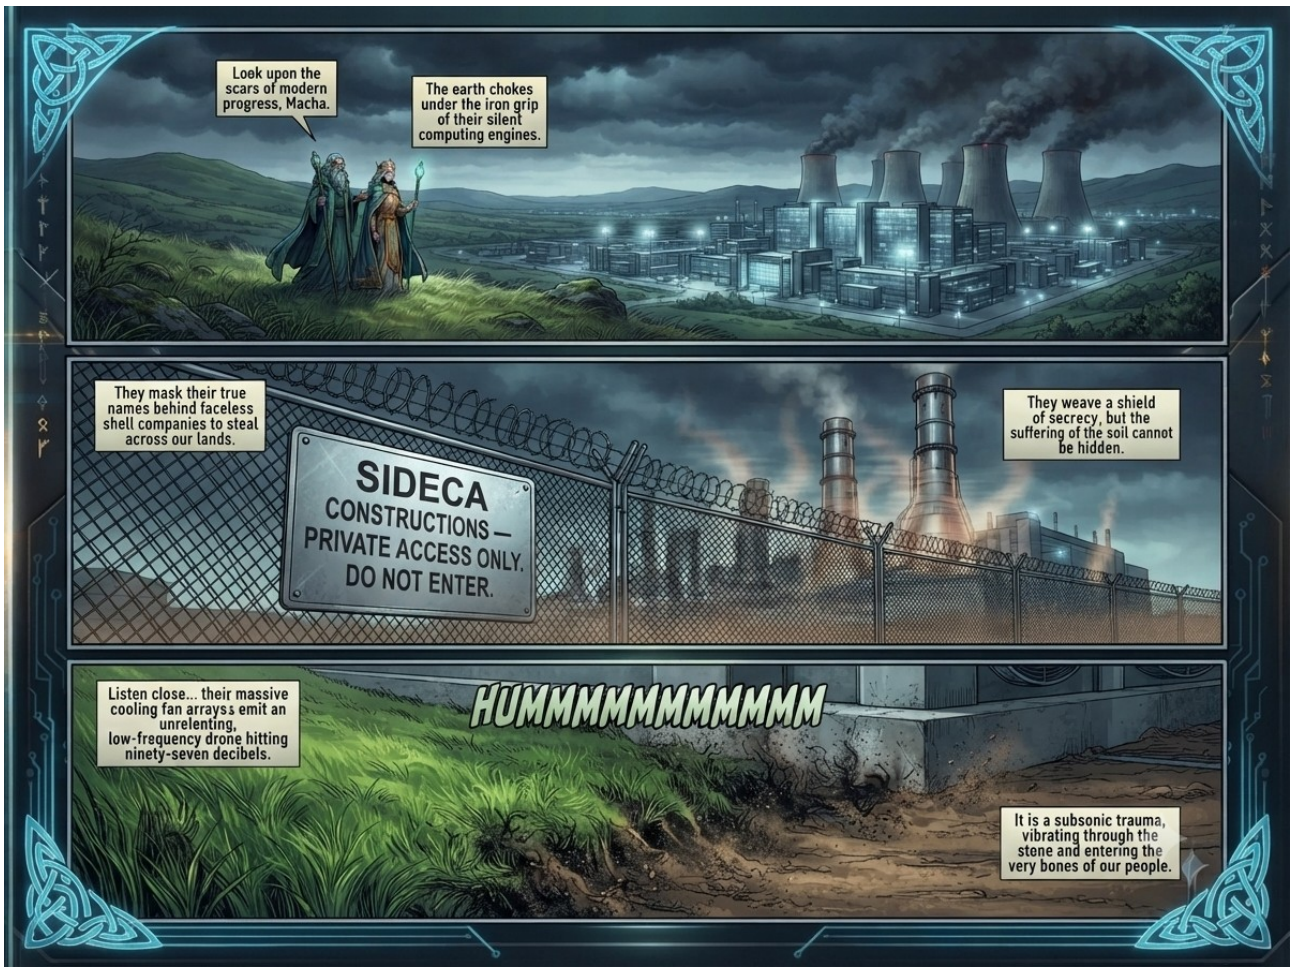
Look at what they have built upon our soil.
"Monoliths of glass and steel, humming with the artificial thoughts of a distant world.
They drink our rivers dry just to keep their silicon cold.
And they poison the veins of Eire in return.
One hundred and twenty-three fortresses of data, starving the living earth.
SFX HUMMMMMMMMM



Look upon the scars of modern progress, Macha.
The earth chokes under the iron grip of their silent computing engines.
They mask their true names behind faceless shell companies to steal across our lands.
SIDECA CONSTRUCTIONS — PRIVATE ACCESS ONLY. DO NOT ENTER.
They weave a shield of secrecy, but the suffering of the soil cannot be hidden.
Listen close... their massive cooling fan arrays emit an unrelenting, low-frequency drone hitting ninety-seven decibels.
HUMMMMMMMMMM
It is a subsonic trauma, vibrating through the stone and entering the very bones of our people.

We cannot sleep... the walls vibrate all of threugh the night.
The regulators lag ten years behind while we pay the price with our health.
They promissd our communities wealth and thousands of stable livelihoods.
A cruel Illusion. Once the heavy build phase wraps up, their multi-acre hub runs with as few as three permanent souls.
They build their grid monopolies and delay our clean targets to feed their artificial thoughts.
No more. Let them see the true sovereign power of Éire.
SFX: KRA-THOOM!
They reject our recyyled gray water and drain millions of liters of pure drinking water right from our aquifers!

SFX: SQUELCH.
WARNING: COOLING LOOP CRITICAL FAILURE. HIGH-HEAT EXTREME DETECTED.
SQUELCH
SFX: VROOOOOOOOM.
They burn unpermitted fossil fuels in the dark to evade the laws of man!
Nature demands a full accounting for the resource theft!
SFX: CRUNCH-SNAP.
The loop is broken. The air grows sweet once more.
This is our legal template for resistance. Let the remaining hubs tremble.

The spirits of the land cry out for justice, old friend.
Then we shall give the earth a voice they cannot ignore.
Awaken, roots of the ancient wood!
CRACK-THOOM
CRUNCH
ZZZALUT!
CRITICAL ERROR: POWER GRID COMPROMISED.

EVERY RIVER, CHOKED WITH THEIR TOXIC "BLOWDOWN". THE VEINS OF EIRE ARE POISONED!
VISCOUS, CONCENTRATED NITRATES AND ANTI-SCALANT SEDIMENT.

THE WATER IS A TOXIC GRAVE, BUT THE BEDROCK OF ÉIRE REMAINS UNYIELDING.
THE ANCESTORS DID NOT JUST LEAVE STORIES, MACHA. THEY LEFT A LEGAL BLUEPRINT IN THE ROCK.
WEAPONIZED NDA
CORPORATE TAX EXEMPTION FORM
The stones read the future . . . . they speak of the "Secrecy Shield."

They hide behind front names like Sidecat and Mellin... blinding the zoning boards to keep neighborhoods in the dark...
The stone reveals their vulnerability! There is no public directory tracking these facilities.
We must manually reconstruct the map by tracking the emergency diesel backup permits they file in secret.
The rock demands a legal template—a 180-day construction moratorium trucks to freeze their concrete trucks.

The Druid: The blueprint is clear. We do nk simply strike the against them.
The blueprint is clear. We do not simply strike, we weaponize their own regulatory omissions against them.
RUMMMBLE
What is that? An earthquake?
FROOOM
The secrery clauses... they're completely dissalving!
The secrecy shield has shattered.
Now, let the citizens of Eire see exactly what breathing.
SCREECH-CRASH!

HELPFUL AI CODEWARRIORS — ACCESS
ACCESS GRANTED TO THE PUBLIC

Good evening, Dublin! You know, I used to rule over kings, but now I'm just trying to figure out why your tech overlords are so thirsty.
Laughter
Big Tech keeps telling you the cloud is an abstract, magical place. Let me tell you, as a literal literal goddess, that "cloud" is just an overheated warehouse in Meath draining five million liters of your drinking water a day!
They call it generative artificial intelligence. But when the summer heat hits twenty-five degrees and their cooling loops fail, they steal your potable water to stop their silicon from melting. That isn't intelligence. That's a sweaty machine.
Too right!
Roaring laughter

And let's talk about their job promises! "We're bringing fifteen hundred construction roles to the community!" they shout.
cough
Out-of-town corporate crews cough.
Exactly! And once the two-year build phase drops off a cliff, do you know how many full-time staff are left running that multi-acre hub?
Three. Three lonely tech guys sitting in a giant, humming tomb.
But don't worry, Dublin! Your utility providers have a grand solution. To sustain these server farms, they're doubling their power capacity by 2059!
Which translates to a lovely fifty-percent hike on your household electricity bills. You're literally paying to subsidize your own resource depletion.
They operate behind strict Non-Disclosure Agreements, masking their identities under front names like Sidecat LLC.
If a druid needs a fake name to buy land, it's a crime. If Big Tech does it, it's a "property tax exemption".

But don't worry, Dublin! Your utility providers have a grand solution. To sustain these server farms, they're doubling their power capacity by 2039!
Which translates to a lovely fifty-percent hike on your household electricity bills. You're literally paying to subsidize your own resource depletion.
They operate behind strict Non-Disclosure Agreements, masking their identities under front names like Sidecat LLC.
If a druid needs a fake name to buy land, it's a crime. If Big Tech does it, it's a "property tax exemption".
We don't need slow regulators to save us. The blueprint for resistance isn't digital—it's a collective civil pushback!
CHEERS AND APPLAUSE
Thank you, Dublin! Remember to check your physical bills, double-check the corporate labels, and keep the earth alive!
Next stop... Belfast. Bring your own water.

Macha:
The network grows. It is no longer just one hundred and twenty-seven.
The Druid:
The comedy tour is paused, Macha. The stones have detected an anomaly in the grid.
SLM EDGE NODE
The Druid:
They ars bypassing public grids, hiding their digital infrastructure from the light.
SLM EDGE NODE
Macha:
The node has targetd d ib direct fink. One hundred and twenty-nine data centers are drawing breath breath tenight.
The Druid:
They are bypassing public grids, hiding their digital infrastructure to from the light.
The Druid:
Look closer at the root code. The Environmental Watchdog AI has flagged an illicit trail.
Macha:
Offshore finance loops... tas shelters bleeding up to a million doilars per position from our local communities.
Offshore finance loops... tax shelters bleeding up to a million dcliars per position from from our local communities.
SLM EDGE NODE

They weave an intricate secrecy shield, but our Ogham Net intercepts the transmission.
Every single full-time slot they boast about is tied to an untaxed machine.
They operate completely outside state territorial controls, acting like an autonomous distributed mesh.
Then we must act outside their regulations. The compiler is primed.
Let the global capital markets feel the physical resistance of the soil.
We are uploading the audit directly to the core infrastructure. Let the system purge begin.

The signal cascades across the hells, a digital rallying cry disguised as ancient air.
HUMMMMMMMMM
HUMMM
The compiler is locked in.
Strike up the drones. Let the network hear hear us.
Sound waves carry the purge code, vibrating through the very earth.
SKIRL!

WAAAAAL!
Switch to the reel! Overload their infrastructure!
My monitors are glitching... the rhythm is overriding the system logs!
Don't fight it! Move!
Don't fight it! Move! The music is making the air shimmer with light trails.
STOMP!
CLAP!
STOMP!
A collective frequency. A physical override.

HUP!
System purge complete. The distributed mesh finds its true power in the dance.
They wanted an audit... we gave a revolution!
CRITICAL OVERLOAD //
ALL SYSTEM DATA
DATA PURGED.
LAUGHTER AND MUSIC CONTINUING INTO THE NIGHT.
SFX LAUGHTER AND MUSIC..

SFX: WEE-WOO-WEE-WOO
The building is alive! Get out!
Your digital kingdam ends where the true sovereignty of Éire begins.
Nature reclaims its debt.
Nature reclaims error error.
One down.
One hundred and twenty-six to go.
